Re: FCC ID: VEYXMODR1W1

To Whom It May Concern:

The following application is submitted on behalf of our client, xG Technology, Inc., for evaluation of their 802.11 b/g module xMaxW for a Class II Permissive Change under FCC Part 15.247.

The purpose of the Class II Permissive Change is to add a new antenna and address co-location to the FCC ID: VEYXMODR1W1 for a specific host configuration. The module is integrated inside of the xG Technology model xMod (FCC ID: VEYXMODR1) host device which includes a 900 MHz radio.

The module was evaluated for radiated emissions as well as for co-location for simultaneous transmission with the 900 MHz radio in the xMod host configuration.

The FCC ID: VEYXMODR1W1 was tested as described above the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
